**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 30 August 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

### DETAILED ACTION

Applicants arguments, filed 8/30/2003, in response to the restriction requirement mailed 10/01/2003, have been considered and the restriction requirement has been withdrawn.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,323,003. Although the conflicting claims are not identical, they are not patentably distinct from each other because the inventions overlap and embrace each other. The invention of the instant claim 1 is broader than the construct of claim 1 of the patent and thus embraces the invention of the instant claim 1-3. The invention of claims 7-12 of the instant invention are narrower in scope in that they require more than one "antisense" or sequence that binds to the sense sequences of the invention and the invention of claim

Art Unit: 1635

1-4 of the patent are broad enough to embrace and do not exclude limitations and the specification of the patent teaches the same embodiments now claimed, for example.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hirashima et al.

Hirashima et al disclose an expression cassette (mRNA) [first strand] targeted by two different micRNA [second strand] that target 1) a twenty-four-base noncoding region plus a 216-base coding sequence, and 2) 19 base region covering the ribosome-binding region. It is noted that these complexes meet all of the limitations of the claim since, for example, the claim does not require that the target molecule be different than the flanking sequence.

Claims 2-12 are free of the prior art searched. See page 4 of the specification for the definition of a “target molecule” and “flanking sequence” and “sense” strand.
